

COGNITIVE SCIENCE

INTRODUCTION

This research group is made up of researchers of: Psychology, Linguistics, Philosophy and Logic. Their main line of work is to study knowledge in an interdisciplinary way, this is done by analyzing non-human knowledge (machinery and animals), and the human knowledge.

RESEARCH TOPICS

- Cognitive Psychology.
- Cognitive Linguistics.
- Philosophy of mind.
- Logic for Artificial Intelligence.
- Research in Cognitive Science:
 - Philosophical logic.
 - Psychological.
 - Computational.

SCIENTIFIC-TECHNICAL SERVICES

- Technical advice on neuropsychological evaluation and rehabilitation.
- Adaptation of software for teaching theoretical-practice.
- Analysis of reading and writing abilities of pupils with hearing disorders.
- Psychology and neuropsychology study of numerical and mathematical abilities.
- Frustration analysis in sports.
- Learning and the development of mental training in sportspeople.
- Theories of mental representation.
- Development techniques for mental representations.
- Logic for Artificial Intelligence.

RESEARCH GROUP LEADER: ANTONIO JAVIER DIEGUEZ LUCENA
PAI CODE: HUM264
