

● ADVANCED AUDIOVISUAL CONTENTS

INTRODUCTION

The research group Advanced Audiovisual Contents studies how to integrate innovation in daily life and how to detect people's creativity, transforming it into business opportunities for content industry. In addition, this group aims to set up a manufacturing sector of digital audiovisual content in Andalusia based on sound knowledge of market trends (user relationship -their new cultural practices- / contents and its narrative/ new media). The development of this network is supported by the leadership of University of Malaga and different companies with track record in developing content for digital media. It also has collaborators from different universities and other autonomous communities, which translates into an alliance that aims to deepen the user, content and business model, developing and expanding a range of applied research was the 'Cross-TV', the convergence of content and interactivity, windows (mobile, Internet and TV/DTT) and users.
